Door Tablet AIO-h
Hardened Workspace Signage Display

DOOR TABLET

Our security hardened purpose-built premium display is placed outside your meeting spaces

Secure
The hardened device prevents rogue admins from installing unauthorized applications via USB ports or recording conversations. Additionally, Wi-Fi and Bluetooth are disabled.

Easy to Install
Works "out of the box" and comes with all the fixtures and fittings needed to get it up where it will be seen. It's easy to mount on any surface including glass, brick and metal.

LED Lighting on Front and Sides
Bright and colorful LED lights on the front and sides of the Door Tablet AIO-h signal that a room is free or busy and are visible from a distance.

RFID Supports for NFC & HiD
RFID/Mifare/FeliCa/HiD card types enable easy user identification when entering rooms by tapping in and out of meetings. Control who can enter rooms if the door unlocking feature is enabled.

Attractive
It is sleek and slim (3cm deep) with a 10.1" high resolution (1280 x 800 dpi) full color touchscreen; meaning it not only looks good, but the display is easy to read and provides smooth interaction.

Sturdy
The screen is tempered glass which means it is tough, easy to clean and will not shatter, crack or deteriorate excessively with time or heavy use.
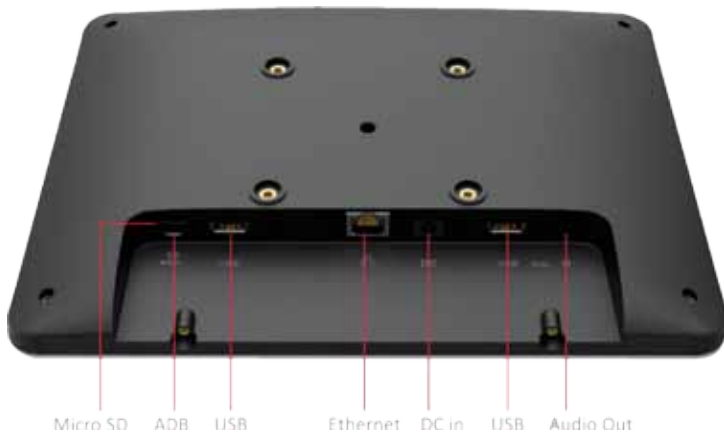

Readable at Wide Viewing Angles
The IPS display ensures the screen can be read comfortably at a distance and at wide angles so there's no need to get up close to read what's being displayed.

Power over Ethernet (PoE+) Built-in
With no need to rely on Wi-Fi signals, a single PoE+ cable powers the AIO-h giving you the benefit of full power management. Shut down and restart screens as needed. No external power supply available.

Micro SD   ADB   USB   Ethernet   DC in   USB   Audio Out

Features

CPU	ARM quad-core 1.6GHz
Memory	2GB DDR3
Storage	8GB eMMC
