

Door Tablet CRE-S

Workspace Signage Touch Display

Purpose-built premium display placed outside your meeting rooms running our Door Tablet application

CRESTRON TSS-770 7"

Easy to Install

Works “out of the box” and comes with all the fixtures and fittings needed to get it up where it will be seen. It’s easy to mount on any surface including glass, brick and metal. Motion sensors and remote LEDs are available as options.

Sturdy

The screen is tempered glass which means it is tough, easy to clean and will not shatter, crack or deteriorate excessively with time or heavy use. It’s built to last and stay looking good.

LED Lighting visible from all angles

LED lights on the device visible from all angles with additional options to attach external lights within the proximity of the tablet.

Readable at Wide Viewing Angles

The IPS display ensures the screen can be read comfortably at a distance and at wide angles so there’s no need to get up close to read what’s being displayed. Automatic dimming ensures lower power consumption.

Attractive

It is sleek and slim with a 7” high resolution (1280 x 800 px) full color touchscreen; meaning it not only looks good, but the display is easy to read and provides smooth interaction.

Power over Ethernet (PoE+) Built-in

With no need to rely on Wi-Fi signals, a single PoE+ cable powers the device giving you the benefit of full power management, saving costs and the environment. Shut down and restart screens as needed.

Easy navigation designed for smaller devices
