

Door Tablet Workplace Signage - Overview

What is Door Tablet

Door Tablet is an end-to-end solution for managing workspaces with interactive signage. It integrates with **Microsoft 365, Microsoft Exchange, Google Workspace, Planon** and more. Door Tablet may also integrate with proprietary schedule systems such as academic scheduling systems, clinical scheduling systems and hotel booking systems.

The solution consists of meeting room displays, hot desking, huddle spaces and phone booths systems. We also offer Wayfinder kiosks to indicate status and availability of resources. Additionally Door tablet offers **motion sensors, capacity sensors and access control systems**.

Door Tablet offers a native App on **Android, iOS and Windows**. We recommend using our purpose-built, professional displays that include mounting kits, LED lights, PoE, and on some models built-in RFID/NFC/HiD readers.

The strength of Door Tablet lies in its power of configuration, customization, features and integrations with smart building solutions. Get an enterprise grade solution, for any size deployment. The solution is reliable, flexible, modular, and expandable. It's also completely customizable, both in terms of looks and business rules.

Ultimate Ease of Booking

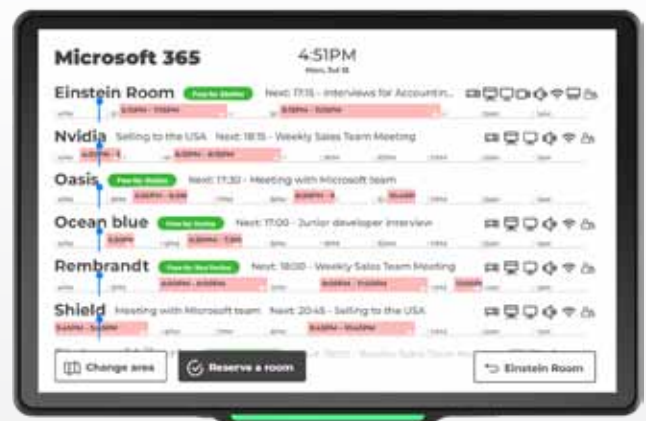

In addition to booking meetings using traditional methods, Door Tablet offers booking from its interactive displays. Tapping “Nearby” on any display pulls up an overview of other workspaces that may be booked immediately.

Integration, Migration and Mobility

Seamlessly integrate Door Tablet to any scheduling system. Migrating to another platform? No problem - take Door Tablet with you. With Door Tablet you are not tied to any technology or system and may easily migrate to a new scheduling system. If you relocate, take the whole Door Tablet system with you.

Secure System Management

Door Tablet can run either on-prem or in your private cloud, giving you complete security control. Manage all functions using a web browser. Administrators have full control of the Door Tablet system and can fine tune the levels of security and authorizations. Enable or disable security features, including booking and meeting

Workspace Signage - branded and flexible

information security. You decide what functions are enabled for different rooms. For example, you may want to block a specific display from being used to book rooms unless the user is authorized. Different users may be allocated different booking privileges via PIN numbers or RFID/NFC. You decide which rooms are available, at what time and where these rooms may be booked - from the booking system, or solely on the touchscreens **outside the room**.

Comprehensive Analytics

Analytics data is collected for every action, allowing you to audit workspace usage. Utilize Door Tablet with your analytics to pinpoint users who mismanage resources, such as booking rooms without using them. Have easy access to daily, weekly, monthly, annual or “any-interval-you-want” reports. Armed with these reports, you can investigate the underlying reasons behind usage patterns and transform the way you use workspaces and manage meetings.

Professional Display

If you have existing tablets you can use it to begin with, before moving to professional hardware. For best results, use our robust, purpose-built tablet devices to take advantage of their extended features and robust life span. Professional displays work “out of the box” and include mounting kit for any surface, enabling you to put them up immediately. They also include LED lights, PoE and WiFi with power saving features which saves costs and creates a healthier environment.

Wayfinding on Large Screen

Door Tablet Wayfinding displays are built for use on large screens, usually placed in a central area like the lobby, reception, or communal space. Use the Door Tablet ABX (Android) and connect it to large TVs. The device plugs in easily to your displays using HDMI, with optional USB connection for touch displays. There is no need to buy expensive smart TV's or new software. Door Tablet Wayfinding provides a number of display types you may choose from:

- Floor Plan
- Schedule
- Cluster
- Airport
- People
- Academic Info

DeskWare Hot Desk System

DeskWare is a simple yet powerful Hot Desk system for both end users and administrators. It enables a seamless experience for booking a desk in advance. Reserve desks with intuitive web application interfaces. Utilize the web-app, the mobile App, and optionally use hardware on desks or in conjunction with Floor Plan kiosks for

Floor Plan Touch Display

flexible booking. Hardware on desks include our circular Door Tablet CIR devices, desk presence sensors, and desk LED lights indicating resource availability from afar. DeskWare **does not require** representation in your scheduling system. Numerous features have been purpose-built for organizations enabling their employees to work in hybrid mode - remotely and from the office.
